

# CURERE

Luxurious Saffron Gel

## Rejuvenate Your Skin, 100% Naturally

Curere Saffron Gel is a 100% natural blend of *aloe vera*, *sandalwood* and *saffron oils* that supports skin cell healing & regrowth. It contains the full spectrum of vitamins, anti-oxidants & amino acids that skin needs to maintain elasticity and youthful radiance. Curere penetrates deep into your skin and it works by activating stem cells below the surface to stimulate growth of new tissue faster than the “old” cells on the skin’s surface.

## Medically & Aesthetically Compelling

Curere can be applied to healthy skin to protect against aging or rubbed directly onto blemishes, dark circles under the eyes, and acne. It can also assist with regenerating skin that has been damaged by burns, cuts, or ulcers. It does this by reducing inflammation while directly supplying damaged skin the nutrients needed to regenerate. Curere’s potent antioxidants protect the skin from damage and it also works as a moisturizer, natural sunscreen and antiseptic.

## An Opulent Blend, Fit for Royalty

King Alexander the Great used saffron to heal battle wounds and Egyptian Queen Cleopatra bathed in it for beautiful skin. When you crack open a jar of Curere Saffron Gel, you will notice the perfume-like, delicately woody & spicy aroma. There’s a silky texture as it glides from your fingertips onto the skin, leaving no visible residue. As it dries, you’ll feel a flush, tightening sensation and a pleasing smoothness on your skin’s surface. Crafted in small batches with some of the finest botanical ingredients on earth, Curere is fit for royalty.

## 3 Pure, Simple Ingredients. Nothing Else!

1. Authentic Aloe Vera Gel
2. Sandalwood Oil
3. Saffron Oil

## We Use Only the Finest Ingredients

Curere contains a base of **authentic medicinal aloe** (*aloe barbadensis*)

gel. While aloe may sound ordinary, a 2016 investigative report by Bloomberg found that none of the “natural aloe vera” products sold at Wal-Mart, Target and CVS contained any aloe whatsoever!

Sandalwood is the second-most expensive wood in the world, and the antioxidant-rich oil produces a distinctive fragrance that has been highly valued for centuries. Studies suggest that sandalwood oil potentially decreases inflammation in skin tissue in addition to having anti-tumor and cancer-
