## For Soothing Relief & Immune Support

Cannabidiol (CBD) from hemp is one of the hottest supplements on the market. But not everyone is comfortable with hemp or can legally access it. That's just one reason Peak Health Center is excited to announce a breakthrough discovery: Kriya® Hops, a 100% natural, botanical CBD supplement that is not made from

- **Not Made from Cannabis**
- **Naturally 100% THC-Free**
- **Legal Worldwide**
- **Superior Bioactivity**

## A Patented, Naturally THC-Free Hybrid

Kriya® Hops is a cannabinoid-rich extract of Asian hops vine (*Humulus yunnanensis*) flowers, available in timed release tablets and fast-acting oral tinctures. The patented Kriya® cultivar of Asian hops (US patent #PP31,477 P3) contains high levels of the non-psychoactive cannabinoids CBD, CBG, CBC and the terpenes caryophyllene & humulene. This remarkable plant naturally contains zero THC: not even in the smallest trace amounts. Kriya® Hops is a close relative of the common hops vine used for brewing beer. Scientists believe that the hops species originally

**CBDx™**  
(Cannabidiol from *Humulus Yunnanensis* var Kriya)

## Gentle Yet Powerful Immune Support

Kriya® Hops is gentle but it has powerful balancing effects on the human endocannabinoid system. Yet unlike cannabis products, Kriya® Hops doesn't come with the risk of intoxication, paranoia, cognitive impairment or other unwelcome effects. The active compounds in Kriya® Hops act as natural, plant-based neurotransmitters that activate CB2 receptors in our immune system, gut, bones and brain – in addition to many other receptors. In 2011 Dr. Mechoulam, the world's leading cannabinoid expert, published a study describing how imbalances of endocannabinoids & CB2 receptors are implicated in most major health issues.

### Rapid & Timed Release Formulas

1. **Timed Release Tablets:** 7.5mg, 40mg & 100mg
2. **Rapid Release MCT Oil:** 300mg, 600mg, 1500mg
3. **Tincture:** 1000mg
4. **Coconut Oil:** 300mg

Available in tablets and oils, starting at \$64.95 MSRP.
